MERAXIS

1 General information

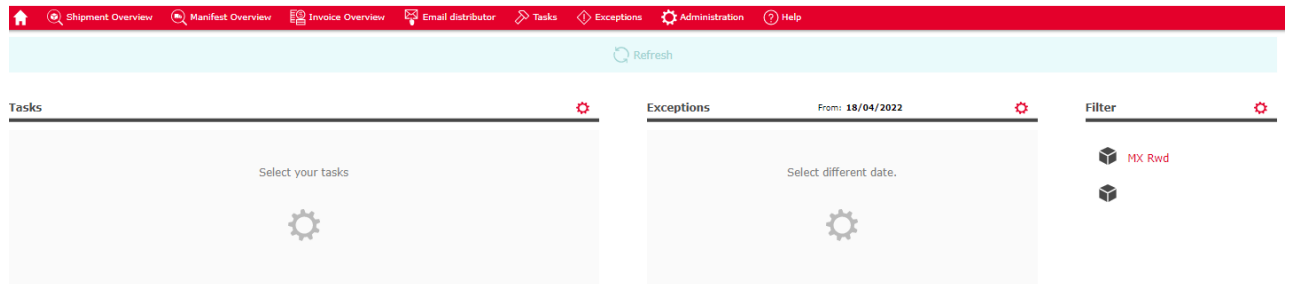

- > The Meraxis AX4 – Portal provides visibility on transport orders due to an integrated solution with Meraxis ERP and the connected forwarders.
- > Transports orders and milestones are available by the AX4 portal and / or connection through EDI.
- > The data is processed on a „near-real-time“ base for Meraxis and its forwarders.
- > Link to AX4: <https://www.ax4.com/ax4/index.jsp>

2 Shippeo

- > Meraxis offers an addition to the service of AX4 with Shippeo.
- > Shippeo is a solution to link shipments shown on AX4 to either TMS or telematics.
- > Information regarding shipments can be exchanged in real time with Shippeo.
- > Shippeo will set events and report exceptions automatically if link to TMS or telematics is successful.
- > You can choose whether you want to set the defined milestones manually in AX4 or be connected with Shippeo telematics or TMS. In any case, AX4 will be the working platform.

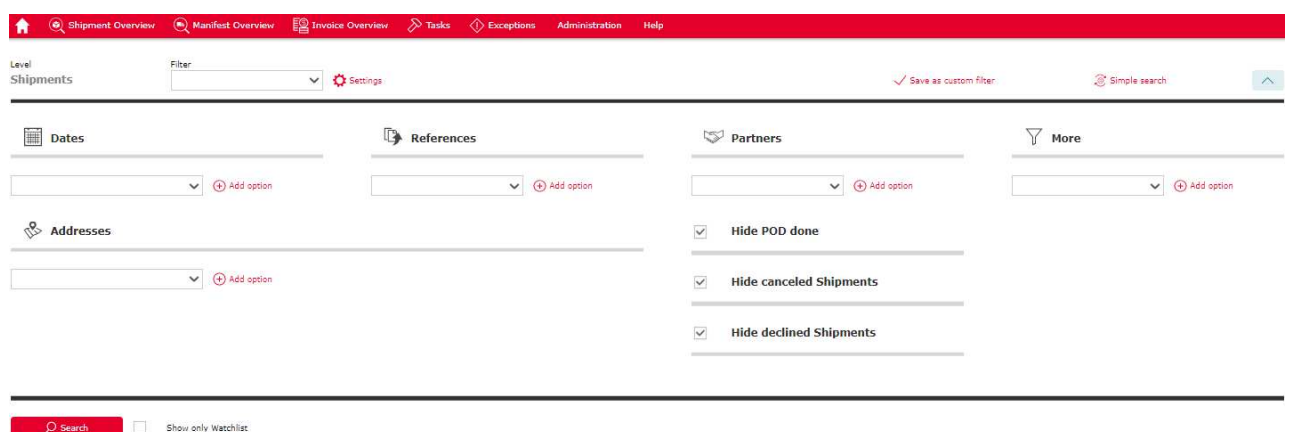

3 Landing page

- > **Shipment Overview** Overview of all shipments workplace for all tasks within the forwarder process.
- > **Exceptions** Overview of reported exceptions by forwarder.
- > **Administration** Management of personal data. Master User: set up of new users (separate manual *Meraxis DIGI SCM AX4 - Forwarder User Setup*).
- > **Filter** Overview of customized filters.

4 Shipment Overview

- > Shipment overview presents all orders.
- > Individual filters can be set for each search or saved as a customized filter layout, which can be selected whenever required.

MERAXIS

> Filters to hide cancelled orders from Meraxis, declined orders from forwarders and orders for which the POD done milestone has been reached, are set automatically but can be removed.

- Hide POD done

- Hide canceled Shipments

- Hide declined Shipments

> Click on the Search button to see all open orders:

Add to watchlist

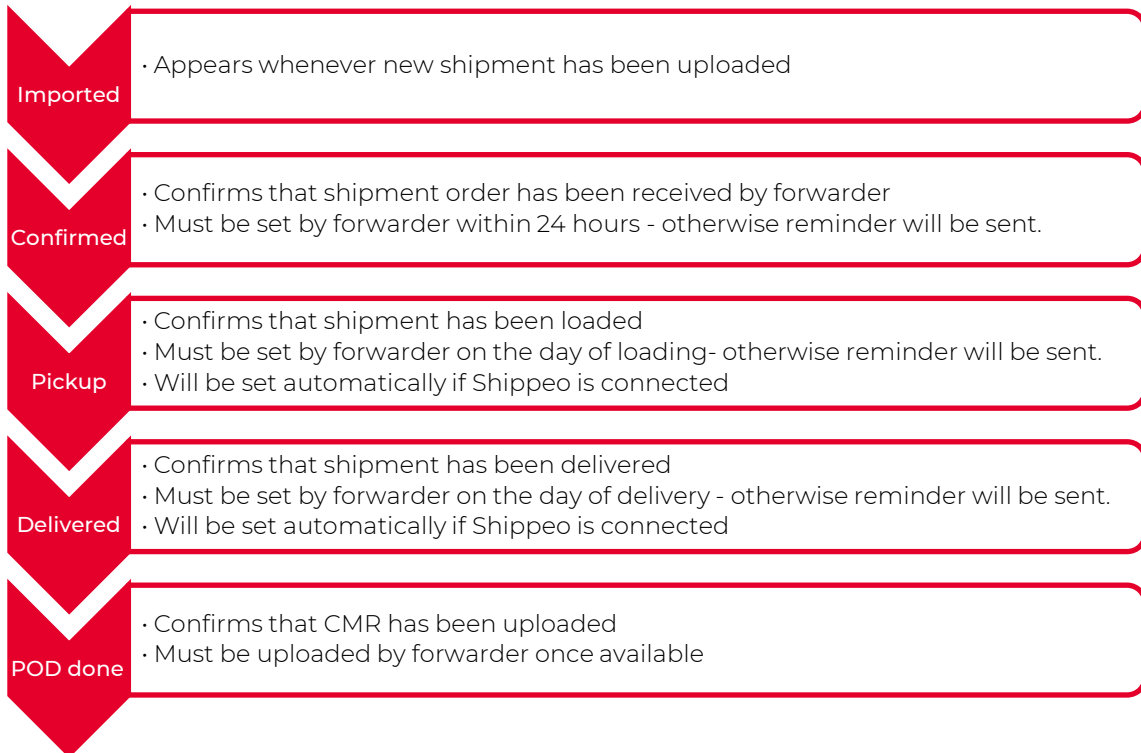

left side and scrolling to the bottom of page.

After orders have been added to the watchlist, they are displayed by selecting the following filter:

Search Show only Watchlist

5 Milestone Plan

- > The milestones can be set with clicking on the next step button 
- > The current milestone appears automatically

- > If you have a connection with Shippeo, these milestones will be triggered automatically by Shippeo GPS events.

- > Milestone overview for each shipment can be opened in milestone plan

Carrier related - Lack of driving time

- > Explanation can be filled out with further info (not mandatory).
- > Please call Meraxis by phone in case there is an urgent and important info that Meraxis needs to know about immediately.
- > Exceptions due to delays are calculated automatically and shown on AX4 if Shippeo is connected (ETA Events).
- > Exceptions can be reported manually even if you are connected to Shippeo. These events replace the automatic ones in any case.

7 Shipment details

- > Shipment details can be used as an overview on the shipment or to change forwarder reference, Truck and Trailer ID.
- > Truck and Trailer ID must be updated immediately in case truck or trailer changes during shipping (especially important if shipment is connected to Shippeo).

Save

8 Automatic emails

- > There are four types of automatic emails sent by AX4 to the forwarders.

New Shipment email

Sent whenever new shipment has been created.

Dear Carrier,

a new order has been created for you.

Shipment Reference: 0080059012
Shipment AX4 ID: 436322208

Thank you!

Yours sincerely
Meraxis-Team

Shipment Update email

Sent whenever existing shipment has been updated. In case Meraxis has to update a shipment with important info you are being informed previously by mail.

Dear Carrier,

one of your orders has been updated.

Shipment Reference: 0080058612
Shipment AX4 ID: 435584418

Changed values:

Weight: 2309.0

Thank you!

Yours sincerely
Meraxis-Team

Reminder email

Sent whenever milestone has not been set until defined time.

Dear Carrier,

Please be so kind and confirm the pending shipment.

Shipment Reference: 0080047074
Shipment AX4 ID: 414095158

Thank you!

Yours sincerely
Meraxis-Team

Cancellation email

Sent whenever a shipment has been cancelled. If Meraxis cancels a shipment you are being informed previously by mail. You may receive a replacement order because the order was cancelled due to internal cause at Meraxis.

Dear Carrier,

Please be informed that the shipper has cancelled following shipment.

Shipment Reference: 0080050569
Shipment AX4 ID: 421712221

Thank you!

Yours sincerely
Meraxis-Team

9 Invoice Overview

- > Invoice Overview presents all open billings.
- > Individual filters can be set for each search or saved as a customized filter layout, which can be selected whenever required.
- > Click on the Search button to see all open orders.

External ID ID	Creation date Modification date	Total gross amount Total VAT amount Total invoice amount	Invoice currency	Exception impact indicator	Reached milestone Last reason Last status date Delay	Responsible Right Now	Next Step	Milestone Plan	Report Exception

9.1 Report extra costs

- > Extra costs can be requested with clicking on “report Exception”.
- > Choose “type of costs” and “amount of money”.
- > Explanation can be filled out with further details. Details on waiting hours must be added if you report “waiting time”.
- > Click on new position.
- > If wished further positions can be added.
- > Whenever all needed positions have been added click on safe button.
- > Extra costs must be reported within seven days after POD upload.
- > Feedback from Meraxis will be uploaded on AX4 and notification will be sent to your email.
- > In case extra costs must be discussed further contact person of shipment (visible in shipment details) shall be contacted by e-mail.

9.2 Invoicing

- > Costs can be invoiced once milestone plan has been completed with upload of POD and extra costs have been accepted.
- > Invoices can be sent to accounting department by post or e-mail to invoic-es.2001@meraxis-group.com.
- > Questions regarding invoices can be sent to tradeaccounting@meraxis-group.com.

10 Reporting

- > Your performance of working with AX4 and your delivery reliability is being measured monthly.
- > Reporting is being sent to forwarders by e-mail.

Your AX4 performance rate in %

Your performance of working with AX4 is being measured with counting the alerts generated by the system:

- > Late confirmations (if this notification occurs after 17:00 we do not count it).
- > Late pick-up
- > Late delivery

If you set a reason code for any loading or delivery delays and inform Meraxis in advance, order is being amended accordingly. Please note, that with a Shippeo connection, only the milestone «confirmed» needs to be set manually. Once plate number is entered on AX4, milestone tracking is triggered automatically.

Formula:

$$\frac{\text{no. of orders without alert}}{\text{no. of orders}} = \text{AX4 Performance in \%}$$

Delivery reliability in %

Your delivery performance is being measured. The ETA date on the transport order is being compared with the time stamp of the milestone «delivered». If the booked milestones are not equal to the ETA date, a deviation occurs resulting in a lower reliability rate.

Formula:

$$\frac{\text{no. orders in time}}{\text{no. of orders}} = \text{Delivery Reliability in \%}$$
